

Guest Editor's Message – Prof. Said DLIMI
Faculty of Sciences, Chouaib Doukkali University, El Jadida, Morocco

The First International Conference on Research and Advancements in Electronics, Energy, and Environment (ICRAEEE 2025) was successfully held in El Jadida, Morocco, from December 11 to 12, 2025. On behalf of the Technical Program Committee of ICRAEEE-2025, it is both a great honor and a genuine pleasure to announce the publication of this special issue of the *International Journal of Microwave and Optical Technology (IJMOT)*, featuring selected papers presented at the conference.

Authors of the accepted papers, following a rigorous peer-review process and presentation at ICRAEEE-2025, were invited to submit extended and updated versions of their work for consideration in this special issue. In accordance with IJMOT's publication guidelines, a total of fifteen papers were selected. These contributions cover a broad spectrum of current and emerging topics in microwave and optical technologies. IJMOT, an international online journal of distinctive scope, aims to foster stronger connections between microwave and optical technologies. It is our sincere hope that this special issue will further highlight the existing and potential synergies between these two important technological domains.

I would like to express my deepest gratitude to Prof. Banmali S. Rawat, Editor-in-Chief of IJMOT, for accepting our request to publish the selected papers from ICRAEEE-2025 as an Special Issue of IJMOT Vol 21, No.2, March 2026 . I also extend my sincere appreciation to the members of the Technical Program Committee for their dedicated and thorough evaluation work.

My special thanks go to Prof. Samir Elouaham and Prof. Aziz Dkiouak for their valuable support and commitment as Guest Editors throughout the editorial process.

Finally, I would like to warmly thank Prof. Shridhar Dandin, IJMOT Web Manager, for his continuous support, insightful guidance, and encouragement, which greatly contributed to the successful completion of this special issue.

Prof. Said DLIMI
