

Editorial Message from Guest Editors

ISMOT 2015 was successfully organized at Hilton hotel, Dresden from June 29-July 1, 2015. The participants, namely researchers, academics and professionals, came from 15 countries such as Germany, India, Japan, Spain, Italy, China, Taiwan, UK and the US.

For the first time ISMOT took place in Germany. It adhered to the fundamental objective of providing an international forum for exchanges of new ideas, thoughts and realizations on physics, technologies and applications of microwave, optoelectronics and related fields. To the highlights belonged the presentation of the 5G Lab Germany, which is an interdisciplinary team with more than 500 researchers from 20 different research areas of TU Dresden. It aims at delivering key technologies for enabling the fifth generation of mobile communication systems (5G).

Moreover, the conference covered interesting topics like components, systems, technologies and new materials for the internet of things, energy harvesting, driver assistance systems as well as satellite systems.

Papers presented in the symposium were selected for publication in this special issue of the International Journal of Microwave and Optical Technology (IJMOT). We take this opportunity to acknowledge the valuable contribution by the authors.

Thomas Gessner,
Professor & Director
Fraunhofer Institute for
Electronic Nano Systems
ENAS and Center for Micro-
technologies at TU Chemnitz,
Germany

Olfa Kanoun
Professor
Chair for Electrical
Measurements and Sensor
Technology, TU Chemnitz,
Germany

Dirk Plettemeier
Professor
Chair for RF and Photonics
Engineering, TU Dresden,
Germany
