

Message from the Guest Editor

Dr. Ahmed El Oualkadi

It is a great pleasure to be the Guest Editor of this Special Issue of the International Journal of Microwave and Optical Technology (IJMOT). This Special Issue covers all the topics of the International Workshop on Microwave & Emerging Wireless Technologies (IW-MEWT 2014) organized at Marrakesh, Morocco in April 14-16, 2014.

This workshop was a research meeting opened to all academic, researchers, professional and students, to discuss innovative ideas and to exchange issues, challenges, new technologies and solutions related to research advances in microwave and wireless communications. The highlights covered interesting topics such as microwave devices & circuits, antennas and wireless communication systems, microwave design techniques, electromagnetic theory, photonics, optical communications and others.

The papers in this special issue were selected on the basis of novelty and originality of the contribution as well as their technical content. I take this opportunity to thank all the reviewers for their strong support and to acknowledge the valuable contribution of the authors.

Ahmed El Oualkadi
